SUMMARY

Full-Stack Engineer with expertise in scalable web applications, AI-integrated architectures, and RAG pipelines. Proficient in designing high-throughput REST APIs and real-time communication systems. Experienced in containerizing workloads and orchestrating end-to-end cloud deployments.

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, SQL

Databases: PostgreSQL, MongoDB Atlas, SQLite, ChromaDB

Frontend: React.js, Next.js 14, Vite, Tailwind CSS

AI / LLM: RAG, LangChain, sentence-transformers, Gemini API

Backend: FastAPI, Node.js, Express.js, WebSockets

DevOps: Docker, Docker Compose, GitHub Actions, Linux, Vercel

EXPERIENCE

Project Engineer · Wipro — Nov 2025 – Apr 2026
Gurgaon, India

- Engineered high-throughput REST APIs (Node.js/Python), reducing microservice latency by 18% via SQL optimization and Redis caching.
- Built interactive React.js/Tailwind dashboards for real-time reporting and secured enterprise data pipelines using JWT/OAuth 2.0.
- Containerized legacy backend workloads with Docker, streamlining multi-service development and eliminating cross-platform configuration errors.
- **Tech Stack:** Node.js, React, Python, PostgreSQL, Docker, Redis, REST APIs

PROJECTS

Defense GPT — Jan 2026

- Engineered an AI-powered exam prep platform with a PDF-based RAG pipeline, reducing document retrieval latency by 35% using sentence-transformers and MongoDB Atlas Vector Search.
- Integrated Groq/Llama 3 and Gemini APIs to deliver multimodal streaming responses, supporting 100+ concurrent users with chat memory and MCQ generation.
- Deployed backend services using Docker and Hugging Face Spaces.
- **Tech Stack:** FastAPI, Next.js, LangChain, Docker | **Links:** Live Demo | GitHub

DevChat — Oct 2025

- Built a real-time collaboration platform (React, FastAPI, WebSockets) processing 500+ events/minute with sub-50ms latency for live messaging, typing indicators, and file uploads.
- Implemented JWT/OAuth authentication and integrated a restricted Python execution environment with real-time output streaming.
- Containerized services using Docker Compose and automated CI/CD deployments with GitHub Actions.
- **Tech Stack:** PostgreSQL, WebSockets, Docker Compose | **Links:** Live Demo | GitHub

EDUCATION

Chandigarh University — Aug 2021 – Jun 2025
B.Tech in Computer Science Engineering — Punjab, India

CERTIFICATIONS

DeepLearning.AI: Intro to TensorFlow, ML & DL

Univ. of Michigan: Web Apps in Django

Infosys: Machine Learning

NPTEL: Introduction to Internet of Things
